EDUCATION

ITM University Gwalior, MP
B.Tech in Computer Science Engineering

Aug. 2022 – May 2026
CGPA: 8.2

NEW Millenium school , MP
Senior Secondary (PCM)

May 2020 – Sep 2022
Percentage: 84.3%

INTERNSHIP

Google for Developers – India Edu Program
AI/ML Intern

Jul 2024 – Sep 2024

- Implemented ML models using Scikit-Learn, Pandas, NumPy. Built projects like house price prediction.
- Explored supervised and unsupervised learning in Google Colab.

Alteryx SparkED
Data Analytics Intern

Apr 2024 – Jun 2024

- Built ETL workflows in Alteryx Designer for data cleaning, transformation, and reporting automation.

SS&C BluePrism
Intelligent Automation Intern

Sep 2023 – Nov 2023

- Developed RPA bots using Blue Prism's Process Studio to automate routine business tasks.

PROJECTS

Sentiments analysis | python, deep learning (BART)

- BART language model used to generate concise summaries of conversational text from the SAMsum dataset, aiming to enhance the efficiency and accuracy.
- Performed tokenization, text normalization on the dataset to ensure compatibility with the model.

Sign language translator / Python, CNN, LSTM

- Objective of a sign language translation project is to bridge the communication gap between the deaf or hard-of-hearing community
- Utilizing camera input for instantaneous translation with frame skipping for efficiency.

Heart Disease Analysis / Python, Scikit-learn, Pandas, Matplotlib.

- Developed a classification model to predict heart disease using Logistic Regression and Random Forest.
- Performed EDA to identify key risk factors such as age, cholesterol, and chest pain type.

Student placement Prediction / Python, Pandas, Logistic Regression, SVM

- It analyzes data such as CGPA, internships, projects, aptitude scores, and soft skills to help institutions identify at-risk students and improve career opportunities.

SKILLS

Languages: Python, C, SQL, HTML

Databases: MySQL, MongoDB

Machine learning: Supervised learning(Regression, Classification) , Predictive Modeling

Deep learning: RNN, CNN, LSTM, BERT, (numpy, Pandas, matplotlib, seaborn, opencv, Tensorflow, Pytorch)

Data Analytics: Data Cleaning, Visualization, Matplotlib.

PROBLEM SOLVING

Solved 30+ coding problems on LeetCode and HackerRank in Python.
